VOYAGER

In-Boom Furling System

An Economical Offshore Passagemaking System with Refined Styling and Easier Installation

The Leisure Furl Voyager system is perfect for serious sailors who enjoy occasional offshore passages but prefer a more stylish look at the mast. Perfect for boats up to 44 feet, it combines the strength of our original Offshore model, with a hidden internal drive system that gives it a clean, elegant look with no through-mast components. Ocean tested in real world conditions for over ten years, it offers all the safety and convenience benefits of the Offshore system in a more affordable and elegant package worthy of your boat's overall appearance.

VOYAGER System Features

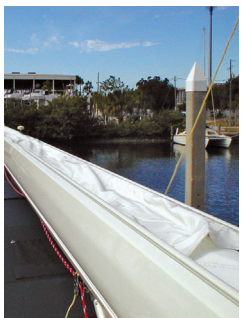

- Ability to hoist, reef, and stow your mainsail from the safety of your cockpit
- Streamlined internal drive systems for a clean overall look
- Simplified installation with no through-mast components
- Full batten mainsail where each batten becomes a quick reef point without leaving the safety of the cockpit
- Reachable boom height components in case a problem occurs – unlike in-mast systems
- Easy to use built-in retractable sail cover
- Semi-custom construction to ensure an exact fit
- Optional color scheme matching
- Aluminum or Carbon Construction

Extended Extra Strong Offshore Gooseneck

Robust & Refined Componentry

Built-In Sail Cover

Elegant Tapered Styling

Each **VOYAGER** System is Customized to Match Your Boat's Specs

Deep Draft Full Batten Sail Performance

In-Boom Systems For Every Style of Sailing

All Leisure Furl Systems Feature

- Ability to hoist, reef, and stow your mainsail from your cockpit
- Custom engineering, fabrication and color matching to fit your boat
- Easily fitted to existing mast without the need to unstep
- High strength marine grade materials
- Exclusive Quick Pull Sail Cover that deploys with a simple line pull
- Controllable full batten sail shape for superior sail performance
- Reachable boom height components in case a problem occurs
- Elegant tapered styling that compliments your boat

OFFSHORE For Boats Between 32' to 75'

The Ultimate In-Boom Ocean Crossing System

Our Offshore in-boom furling system is the one that started it all. Its robust design is engineered for around the world sailing in all conditions.

- Elegantly tapered for weight savings & aesthetics
- Manual override
- Exclusive low-profile REEF-LOK™ system to reduce halyard strain
- Available with electric or hydraulic drive options

PASSAGEMAKER For Boats Between 38' to 53'

Streamlined Offshore In-Boom Furling System

The perfect solution for offshore sailors who prefer the look of a less pronounced backup drive on the front of the mast but still want all the proven technology of the original Leisure Furl Offshore™ system.

- Streamlined internal aft drive system for an overall clean look
- Eliminates forward drum to clear space for deck level vertical pole storage
- Exclusive low-profile REEF-LOK™ system to reduce halyard strain
- Available with electric or hydraulic drive options

VOYAGER For Boats Between 33' to 44'

Refined & Economical Offshore Passagemaking

The Voyager system is perfect for serious sailors who enjoy occasional offshore passages but prefer a more stylish look at the mast. It uses a hidden internal drive system that gives it a clean, elegant look with no through-mast components.

- Streamlined internal drive systems for an overall clean look
- Simplified installation with no through-mast components
- Extended extra strong offshore gooseneck
- Easier aft drive mandrel installation

COASTAL For Boats Between 25' to 32'

In-Boom Furling for Smaller Boats

The Leisure Furl® Coastal™ system offers smaller boats the safety and convenience of in-boom mainsail handling in a system specifically designed and sized to boats of this size.

- Easily fitted to an existing mast
- Aft drive mandrel uses fiber impregnated composite bearings
- Complete freedom of rotation under the highest loads
- Easier aft drive mandrel installation
